Objective/Goals

Business Understanding

- "Global Mart" is an online store super giant having worldwide operations. It takes orders and delivers across the globe and deals with all the major product categories - consumer, corporate & home office

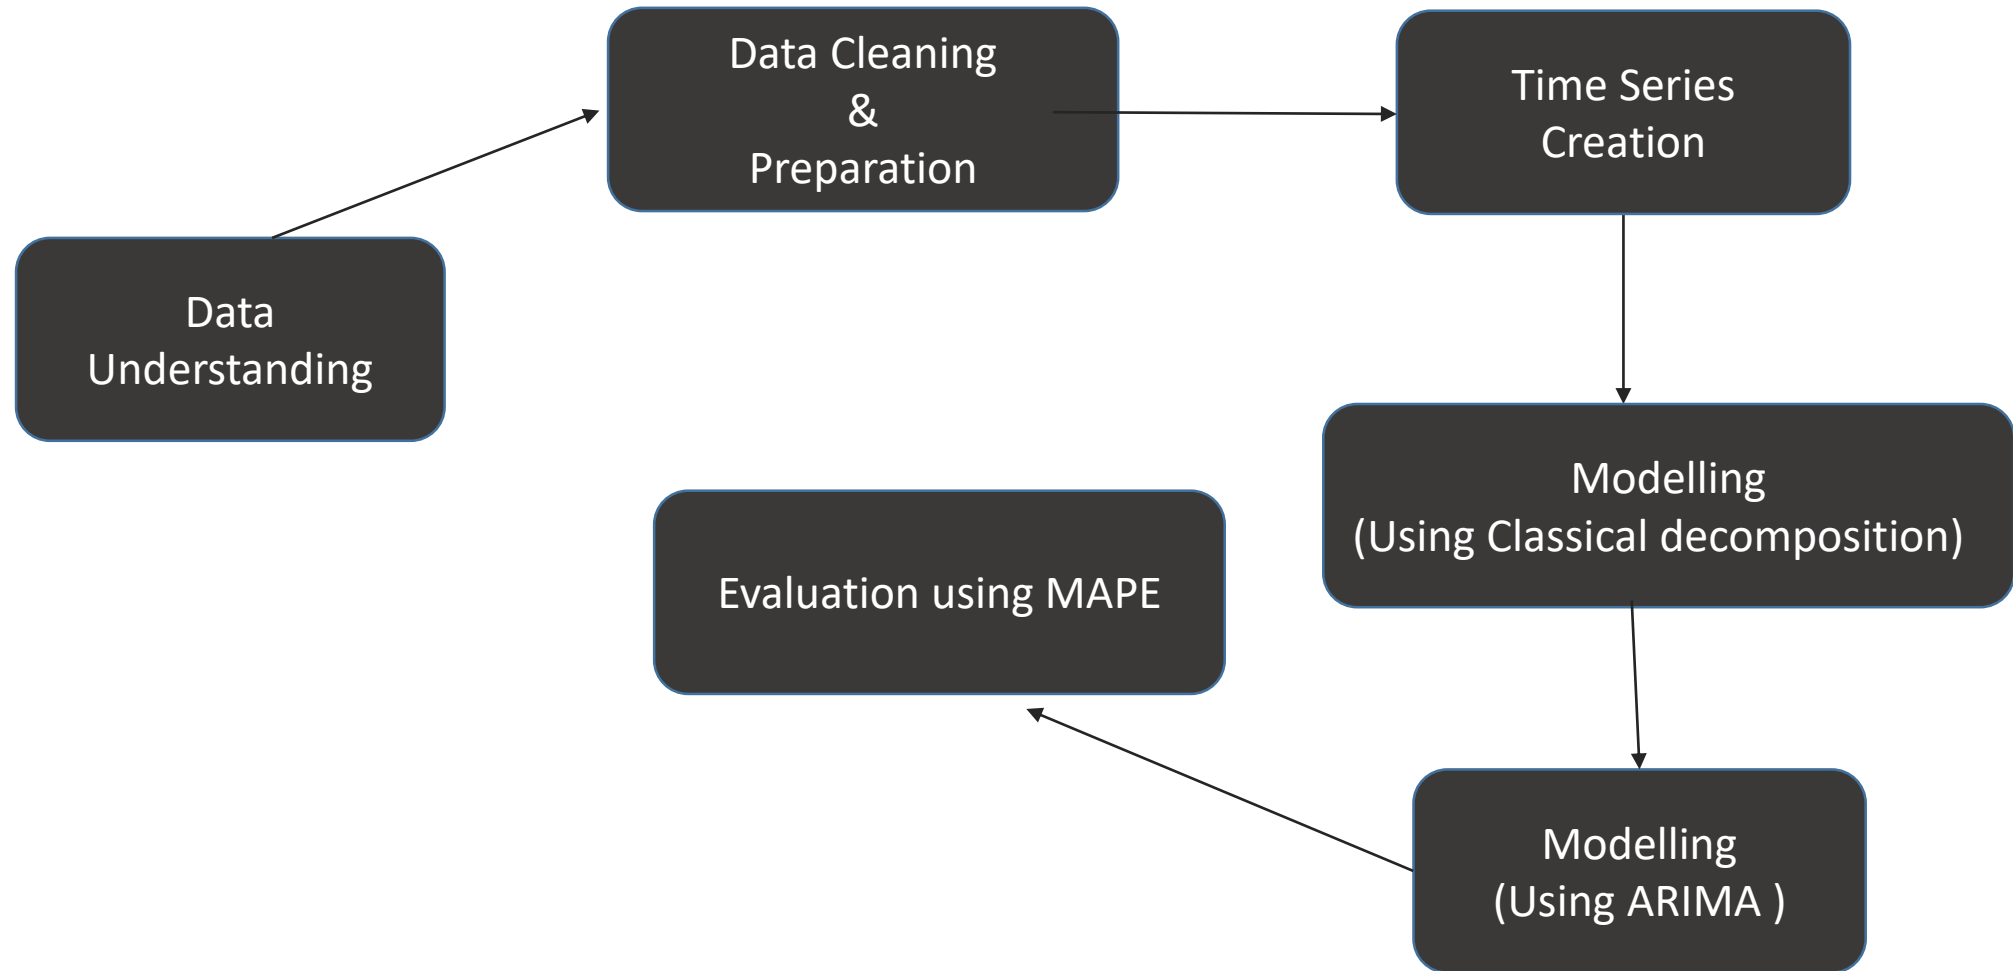

Objective

- Finalize the plan for the next 6 months that would help to manage the revenue and inventory accordingly.
- Find the 2 most profitable and consistent buckets of 21 buckets from 7 different market segments and in 3 major categories.
- After finding the 2 buckets we need to forecast the sales and quantity for next 6 months

Strategy

- Perform Data understanding, cleaning & Preparation
- Perform Time Series Model building
- Perform Model evaluation, Validate forecast using out of the sample figures.

Problem Solving Methodology

Data Cleaning & Preparation

- Missing values for Postal Code column only
 - As this is insignificant column, **not handling missing values**. Rather discarding this column.
- There are 24 attributes in the dataset
 - Considering columns of interest, i.e. **Market, Order Date, Segment, Market, Sales, Quantity and Profit**
- There is 48 months data starting from 01-01-2011
 - Date formatting and converting to Months, so as to create Timeseries
- No Outlier treatment for Sales, Quantity and Profit
 - As we wish to forecast for Time Series, avoiding outlier treatment.

Data Understanding

- Transaction level data for order details is present in the dataset
- There are 7 Markets and 3 Segments
 - Converted these into 21 market segments
- Calculated Total Profit, Average Profit and COV for Profit.
 - Based on these factors determined 2 most profitable and consistently profitable segments

segment	cov	total_profit	average_profit	SegmentName
7	0.62	188687.71	3930.99	EU_Consumer
4	0.63	222817.56	4642.03	APAC_Consumer
11	0.66	120632.93	2513.19	EMEA_Corporate
5	0.70	129737.23	2702.86	APAC_Corporate
8	0.76	123393.98	2570.71	EU_Corporate
12	0.81	57875.42	1205.74	EMEA_HomeOffice
16	1.00	91979.13	1916.23	LATAM_Consumer
18	1.01	134119.21	2794.15	LATAM_HomeOffice
6	1.05	83445.25	1738.44	APAC_HomeOffice
14	1.10	60298.68	1256.22	Africa_Corporate
9	1.12	60748.05	1265.58	EU_HomeOffice
10	1.18	43135.13	898.65	EMEA_Consumer
15	1.32	47772.10	995.25	Africa_HomeOffice
1	1.40	9677.70	230.42	US_Consumer
2	1.55	5036.46	148.13	US_Corporate
17	1.78	20686.97	430.98	LATAM_Corporate
13	1.79	20412.57	425.26	Africa_Consumer
19	2.19	25532.57	531.93	Canada_Consumer
3	2.24	3103.23	124.13	US_HomeOffice
21	4.47	12499.13	260.40	Canada_HomeOffice
20	5.88	5866.26	122.21	Canada_Corporate

Time Series for EU and APAC regions

[Sales, Demand/Quantity and Profit]

EU & Consumer Sales

EU & Consumer Quantity

EU & Consumer Profit

APAC & Consumer Sales

APAC & Consumer Quantity

APAC & Consumer Profit

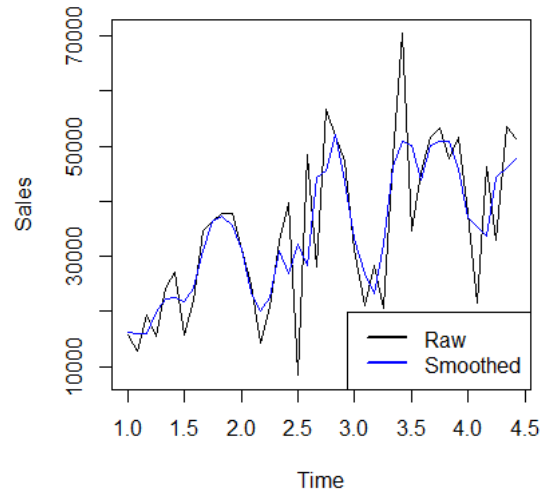

Model building

Considering 42 months data for training and the last 6 months for Out of Sample test.

EU & Consumer Sales

APAC & Consumer Sales

APAC & Consumer Quantity

EU & Consumer Profit

APAC & Consumer Profit

Consumer EU – Sales

[Classical Decomposition]

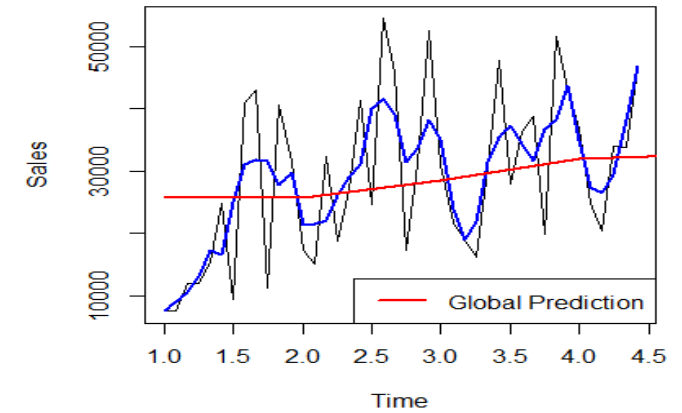

EU & Consumer Sales

Consumer Sales in EU - Smoothened time Ser

Consumer Sales in EU - Smoothened time Ser

ACF for EU_Consumer Sales

PACF for EU_Consumer Sales

Residual Series
(No Autoregressive behavior in
residual time series
based on KPSS test and ADF test)

Consumer EU – Sales

[ARIMA method]

Forecasting Method	MAPE
Classical Decomposition	40.43501
ARIMA	15.7522

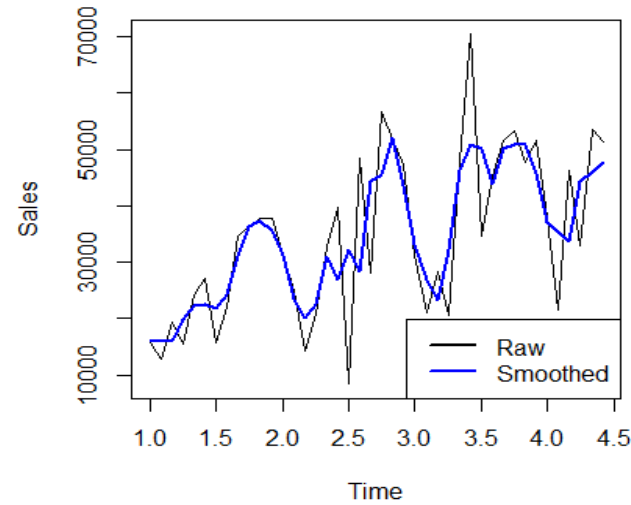

Consumer APAC – Sales

[Classical Decomposition]

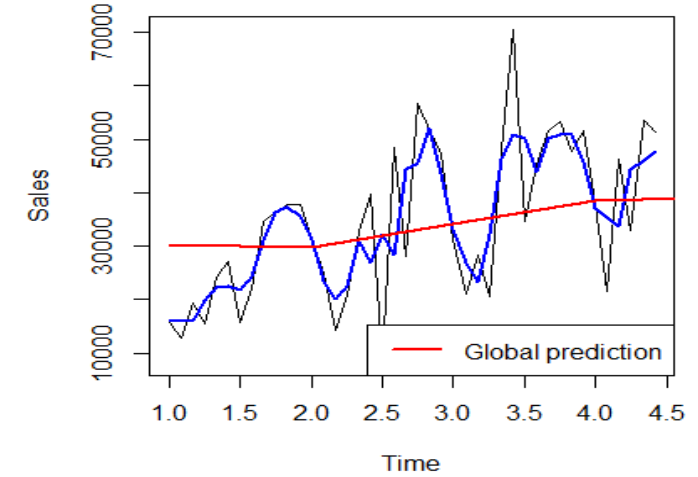

APAC & Consumer Sales

Consumer Sales in APAC - Smoothened time Se

Consumer Sales in APAC - Smoothened time Se

Original & Forecasted Values

ACF for APAC_Consumer Sales

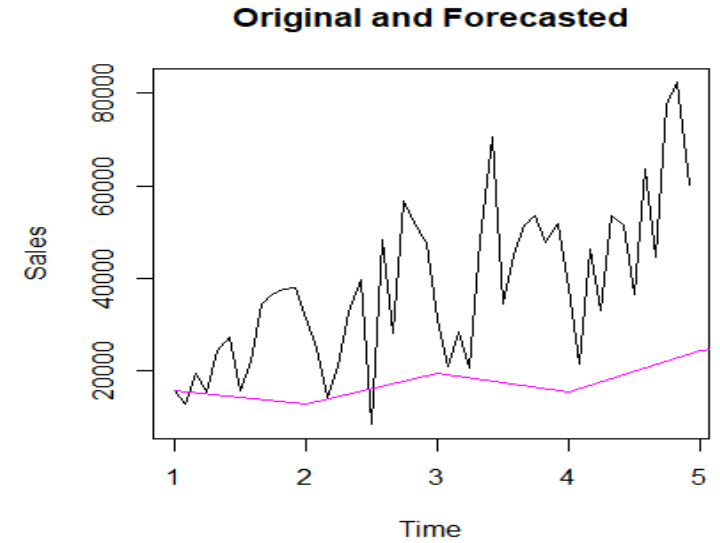

PACF for APAC_Consumer Sales

Residual Series
(No Autoregressive behavior in residual time series based on KPSS test and ADF test)

Consumer APAC – Sales

[ARIMA method]

Forecasting Method	MAPE
Classical Decomposition	39.9417
ARIMA	11.776

Consumer EU – Quantity [Classical Decomposition]

EU & Consumer Quantity

Consumer Quantity in EU - Smoothened time Se

Consumer Quantity in EU - Smoothened time Se

Original & Forecasted values

ACF plot for EU_Consumer Quantity

PACF plot for EU_Consumer Quantity

Residual Series
(No Autoregressive behavior in
residual time series
based on KPSS test and ADF test)

Consumer EU – Quantity

[ARIMA method]

Forecasting Method	MAPE
Classical Decomposition	43.25895
ARIMA	17.61852

Consumer APAC - Quantity [Classical Decomposition]

APAC & Consumer Quantity

Consumer Quantity in APAC - Smoothened time

Consumer Quantity in APAC - Smoothened time

Original and Forecasted

ACF plot for Consumer Quantity - APAC

PACF plot for Consumer Quantity - APAC

Residual Series
(No Autoregressive behavior in
residual time series
based on KPSS test and ADF test)

Consumer APAC - Quantity

Forecasting Method	MAPE
Classical Decomposition	46.02607
ARIMA	13.36779
